Experience

Cavite State University - Research, Development, and Extension (RDE) Unit

Silang, Cavite

Back-end Developer

March 02, 2026 – May 29, 2026

- Led the backend migration of the capstone project from Flutter/Dart with Firebase to a more scalable stack using Node.js and MySQL.
- Designed and implemented database migration strategies, ensuring secure data transfer and system integrity.
- Directed backend development tasks, including restructuring logic, fixing functions, and optimizing query performance.
- Collaborated with the team to align backend integration with frontend requirements, contributing to the successful project launch.

Technical Projects

One Tour: Tara Silang

Back-end Developer

- Migrated backend architecture from Firebase to Node.js with MySQL database integration.
- Designed and executed database migration strategies ensuring secure data transfer.
- Optimized backend performance and improved query handling.

Sit and Zip Garden Cafe

Back-end Developer

- Developed backend services for a mobile point-of-sale and reservation system using Java and Firebase.
- Implemented secure authentication, order management, and reservation workflows with real-time database support.
- Optimized backend APIs and logic to ensure fast transaction processing and seamless integration with the mobile frontend.
- Collaborated with the project team to align backend functionality with café operations and user requirements.

Education

Cavite State University - Silang Campus

Silang, Cavite

Bachelor of Science in Information Technology

2022 - 2026

- Relevant Coursework: OOP, Data Structures, Web Systems & Technologies, Advanced Database Management

Emilio Aguinaldo College – Cavite Campus

Dasmariñas City, Cavite

TVL Track: Information Communications Technology

2020 – 2022

Technical Skills

- **Languages & Web:** HTML, CSS, JavaScript, PHP, Dart, Java, Python, C++, C#
- **Frameworks & Mobile Development:** Flutter, Xamarin
- **Backend & Databases:** Node.js, MySQL, Firebase
- **Tools:** Git/GitHub, XAMPP
- **Development Practices:** Object-Oriented Programming (OOP), API Development & Integration (CRUD operations, real-time database), Debugging & Performance Optimization
